VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made: see separate sheet

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The nearest state of the art is disclosed in GB-A-2 300 906 (D1). The apparatus and method disclosed in this document have the disadvantage that, although they work well with the type of Cathode Ray Tubes depicted in the drawings of it, and with some other large glass items, they are not very suitable for the heat treatment of other glass articles, like the newly designed flatter and thinner Cathode Ray Tubes. Such other glass articles call for a much closer control over the temperature of the glass articles being heat treated over time, to avoid the occurrence of stress lines, cracking or breaking.

Consequently, the object of the invention is as specified in lines 8 to 11 of page 2, which object is achieved by the apparatus of claim 1 and the method of claim 14, to which there is no lead in the available prior art document D1, so that the apparatus of claim 1 and the method of claim 14 appear to involve an inventive step and these claims appear to meet the requirements of Articles 33(2), (3) and (4) PCT.

As in dependent claims 2 to 13 and 15 to 18 preferred embodiments of the apparatus of claim 1 and the method of claim 14 are defined, these claims also appear to meet the requirements of the above articles.

Re Item VII

Certain defects in the international application

As GB-A-2 300 906 (D1) discloses the nearest state of the art this document 1. should not only be mentioned in the introduction to the description but also summarized. Here it is not sufficient to state that the content of this document is incorporated by reference (see Rule 5.1(a) and (b) PCT). As the independent claims of the application are drafted in the one part form this summary should be extensive, that is, all features of the independent claims which are known from D1 should be comprised in this summary (see the PCT International Preliminary Examination Guidelines (PCT-IPEG), C III, 2.3a). It is noted that the description in

relation to the figures (as from page 9, line 18) comprises comparisons with the prior art disclosed in D1. Such indications of the differences between the invention and D1 belong in the introduction to the description (Rules 5.1(a) and (b) PCT). Also lines 1 to 11 of page 13 belong in the introduction to the description.

The claims of the application are not provided with reference signs, as required by 2. Rule 6.2(b) PCT.

Re Item VIII

Certain observations on the international application

On pages 7 and 8 two apparatus are stated to be provided by the invention which apparatus are not defined in the claims, thereby introducing obscurity into the claims (see PCT-IPEG, C III, 4.3). Especially the statement bridging pages 8 and 9 is extremely obscure.

X The applicant is hereby notified that the international Search Report has been established and is transmitted herewith. Filing of amendments and statement under Article 19: The applicant is entitled, if he so wishes, to amend the claims of the international Application (see Rule 46): When? The time limit for filing such amendments is normally 2 months from the date of transmittal of the International Search Report; however, for more details, see the notes on the accompanying sheet. Where? Directly to the International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland Fascimile No.: (41-22) 740.14.35 For more detailed instructions, see the notes on the accompanying sheet. The applicant is hereby notified that no international Search Report will be established and that the declaration under Article 17(2)(a) to that effect is transmitted herewith. With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that: the protest together with the decision thereon has been transmitted to the international Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices. no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made. Further action(s): The applicant is reminded of the following: Shortly after 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the international Bureau as provided in Rules 90bis.1 and 90bis.3, respectively, before the completion of the technical preparations for international publication. Within 19 months from the priority date, a demand for international preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later). Within 20 months from the priority date, the applicant must perform the prescribed acts for entry into the national phase before all deelgnated Offices which have not been elected in the demand or in a later election within 19 months from the priority date or could not be elected because they are not bound by Chapter II. PATENT COOPERATION TREATY

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the PCT Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international politication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been its filed, see below.

How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

- [Where originally there were 48 claims and after amendment of some claims there are 51]:
 Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added.
- Where originally there were 15 claims and after amendment of all claims there are 11]: *Claims 1 to 15 replaced by amended claims 1 to 11.*
- [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
 "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or
 "Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
- 4. [Where various kinds of amendments are made]: "Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

"Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

It must be in the language in which the international appplication is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

PATENT COOPERATION TREATY

From the INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

CROSTON, David WITHERS & ROGERS Goldings House 2 Hays Lane London SE1 2HW

GRANDE BRETAGNE

NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY **EXAMINATION REPORT**

(PCT Rule 71.1)

Date of mailing (day/month/year)

13.11.2000

Applicant's or agent's file reference

DC.RP.19-17

IMPORTANT NOTIFICATION

International application No. PCT/GB99/03659

International filing date (day/month/year) 05/11/1999

Priority date (day/month/year)

05/11/1998

Applicant

STEIN ATKINSON STORDY LTD. et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

Applicant				
STEIN ATKINSON STORDY LTD. 6	et al.			
 This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36. 				
2. This REPORT consists of a total of	5 sheets, including this cover s	heet.		
This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).				
These annexes consist of a total of 2 sheets.				
This report contains indications relating to the following items:				
I ⊠ Basis of the report				
II Priority	•			
	pinion with regard to novelty, inv	entive step and industrial applicability		
IV ☐ Lack of unity of invention		φ,,		
VI Certain documents cite	ed

		tions and explanations separate sheet	5		

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made: see separate sheet

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The nearest state of the art is disclosed in GB-A-2 300 906 (D1). The apparatus and method disclosed in this document have the disadvantage that, although they work well with the type of Cathode Ray Tubes depicted in the drawings of it, and with some other large glass items, they are not very suitable for the heat treatment of other glass articles, like the newly designed flatter and thinner Cathode Ray Tubes. Such other glass articles call for a much closer control over the temperature of the glass articles being heat treated over time, to avoid the occurrence of stress lines, cracking or breaking.

Consequently, the object of the invention is as specified in lines 8 to 11 of page 2, which object is achieved by the apparatus of claim 1 and the method of claim 14, to which there is no lead in the available prior art document D1, so that the apparatus of claim 1 and the method of claim 14 appear to involve an inventive step and these claims appear to meet the requirements of Articles 33(2), (3) and (4) PCT.

As in dependent claims 2 to 13 and 15 to 18 preferred embodiments of the apparatus of claim 1 and the method of claim 14 are defined, these claims also appear to meet the requirements of the above articles.

Re Item VII

Certain defects in the international application

As GB-A-2 300 906 (D1) discloses the nearest state of the art this document 1. should not only be mentioned in the introduction to the description but also summarized. Here it is not sufficient to state that the content of this document is incorporated by reference (see Rule 5.1(a) and (b) PCT). As the independent claims of the application are drafted in the one part form this summary should be extensive, that is, all features of the independent claims which are known from D1 should be comprised in this summary (see the PCT International Preliminary Examination Guidelines (PCT-IPEG), C III, 2.3a). It is noted that the description in **EXAMINATION REPORT - SEPARATE SHEET**

relation to the figures (as from page 9, line 18) comprises comparisons with the prior art disclosed in D1. Such indications of the differences between the invention and D1 belong in the introduction to the description (Rules 5.1(a) and (b) PCT). Also lines 1 to 11 of page 13 belong in the introduction to the description.

2. The claims of the application are not provided with reference signs, as required by Rule 6.2(b) PCT.

Re Item VIII

Certain observations on the international application

On pages 7 and 8 two apparatus are stated to be provided by the invention which apparatus are not defined in the claims, thereby introducing obscurity into the claims (see PCT-IPEG, C III, 4.3). Especially the statement bridging pages 8 and 9 is extremely obscure.
